

HEAVY DUTY PUMP INNOVATION IS ALWAYS SMART.

What's smarter than full impeller access and an easily removable rotating assembly? Having all that pump backed by premium castings and up to 3500 GPM capabilities with up to 135 ft. of head. The TFCC -10, 10" connection is a heavy duty trash pump with innovative components like double floating mechanical seals and solids handling impellers for higher volume wastewater transfer.

FEATURES

REMOVABLE ROTATING ASSEMBLY

Experience less downtime and maintenance hassles with the Trash Flow's removable rotating assembly. The pump volute and piping are not disturbed during maintenance.

DOUBLE FLOATING MECHANICAL SEAL

Wastecorp's mechanical seals are designed for the harsh pumping conditions in today's municipal and industrial solids handling jobs.

SOLIDS HANDLING IMPELLERS

Trash Flow pumps feature our standard premium two-vane solids handling impellers with solids handling capabilities up to 3" (75mm).

OPTIONAL SUCTION AND DISCHARGE GAUGES

Monitor operating pressure easily with Wastecorp's optional suction and discharge gauges.

OPTIONAL CONFIGURATIONS

SEWAGE LIFT STATIONS

Let our pump designers engineer the ultimate lift station for your facility. We offer complete packaged solutions including control panels, valves and more.

TRAILER OR SKID MOUNT ENGINE

With our trailer or skid mounted diesel engine trash pumps, you'll get a DOT approved solutions for mobile wastewater transfer

Determine NPSHr prior to using repriming table. Do not use as available suction lifts.

$$BHP = \frac{GPM \times FT \times SG}{3960 \times Efficiency}$$

$$KW = \frac{M^3 / HR \times M \times SG}{367 \times Efficiency}$$

Suction lift is limited by the available NPSH which is the corrected atmospheric pressure minus the dynamic suction lift, vapor pressure loss and 2 foot safety factor.

Factory certified tests are performed using Hydraulic Institute acceptance Level B.
 The performance curve shown were taken from actual tests of standard production pumps, and reflect an average performance of the pumps indicated.
